

The **IBSSweb** Enterprise Security Management Software is truly scalable and can be expanded with add-on modules to offer fully integrated security solutions.

The **Roll Call Report** or mustering report add-on module allows users to generate reports based on the event transaction database, with configurable options including zone, entry/exit devices, presence/absence, and time/date.

The configuration parameters can be saved in profile record for quick and easy access. This software module is suited to emergency roll call, incident investigation, occupation analysis, attendance reports, etc.

Key Features

- Zones with one or more department codes can be configured

- Reports can be generated for present or absent users

- Display of last entry/exit point with date/time information

- All configurable parameters are stored in a profile report for easy retrieval and operation

- Configurable entry/exit readers within each zone

- Select whether to consider event messages as Access Granted only or Access Granted & Denied

- Full record filter parameter list and report summary as report headers
